Corporate Governance

COBIT 2019 · ERM Integration · Board Oversight

Governance Gaps

● Reporting focused on financial performance only

● Limited reporting on cyber resilience

● No AI model governance reporting

● No data ethics oversight at board level

● No dedicated AI governance committee

COBIT 2019 Alignment

EDM03 Board accountability for cyber & AI risk

DSS05 Manage security services operationally

APO12 IT risk register linked to enterprise risk

BAI Security & AI ethics review at every SDLC gate

Recommended Disclosures (SEC/JSE/NSE)

Board cyber competency

Dedicated cyber committee

Cyber Fusion Centre · AI Ethics Board · IESBA 2025 Considerations

Current State

Technology & Risk operate independently

- Siloed risk decisions
- Slow incident response
- No integrated AI ethics function

Future State: Cyber Fusion Centre

Independent AI Ethics Board

- Independent of technology and business
- Defined terms of reference
- Rotation of assurance providers
- Mandatory disclosure of AI limitations

IESBA 2025 IESSA Considerations

- Advocacy Threat**
Pressure to promote AI without balanced risk disclosure
- Self-Review Threat**
Auditors must not audit AI systems they helped design
- Safeguard**
Independent AI model validation & mandatory limitation disclosures

Strategic Management

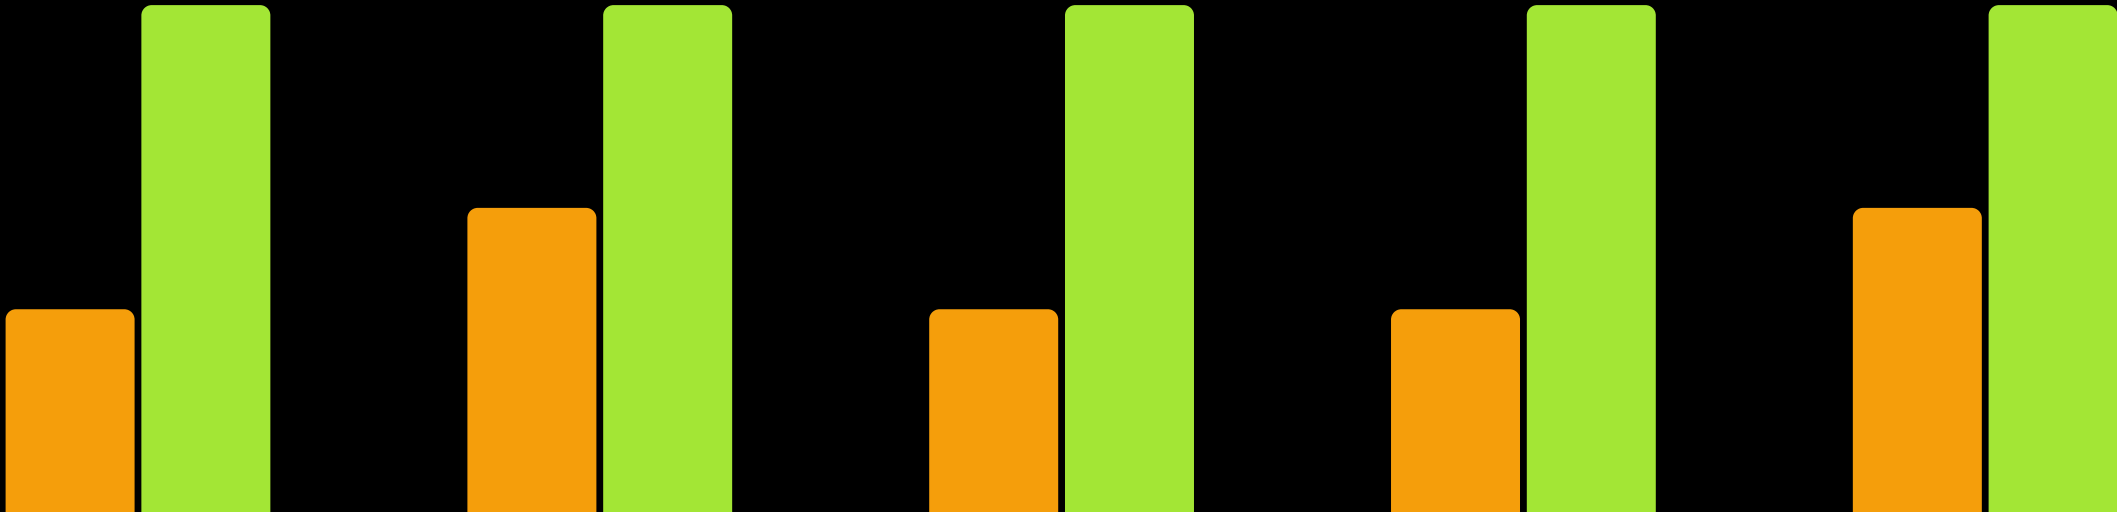

Strategic Objectives · Incident Impact · Regulatory Complexity

Incident Scenario — Customer Database Breach

NIST CSF Maturity — Current vs Target

Regulatory Complexity

Risk Register

Key Risks · Likelihood · Impact · Mitigation Recommendations

Risk	Likelihood	Impact	Category
Mobile Money Breach	High	Critical	Cyber Incident
AI Model Bias / Failure	Medium	High	AI Governance
Cloud Failure	Medium	High	Technology
Vendor Breach	High	High	Third-Party Risk
Regulatory Non-Compliance	High	High	Regulatory

Mitigation Recommendations

Governance	Establish AI Governance Committee with board-level oversight
Technology	Zero Trust Security Architecture + continuous vulnerability monitoring
Risk	Quarterly penetration testing and annual cyber simulations
AI	Independent model validation; rotate assurance providers
Disclosure	Mandatory AI limitations in sustainability and ESG reports
